NAME: Lozano, Ianna E.

LABORATORY 10: Comparative Resume Generation using Multiple LLMs blocks

SECTION 1 - PROMPT USED
Create a one-page professional resume using the following details. Use a clean, modern, and professional layout with clear section headings such as Header, Education, Skills, and Projects/Experience. Keep the content concise, well-organized, and easy to read. Use bullet points for skills and experience, and ensure proper alignment and spacing throughout the document. Avoid unnecessary symbols or overly decorative elements, and make sure the overall design is suitable for internship or entry-level job applications.

Name: Ianna E. Lozano
Email: ielozano@addu.edu.ph
Phone: 09912251658

Education:

Ateneo de Davao University
 Bachelor of Science in Civil Engineering
 2022 – Present (3rd Year)

University of Mindanao Tagum College
 STEM Strand
 2020 – 2022

Legacy College of Compostela
 2016 – 2020

Legacy College of Compostela
 2010 – 2016

Skills:
AutoCAD (2D drafting and basic layouting)
Microsoft Excel (basic formulas, data organization)
Engineering Mathematics and Problem Solving
Basic Quantity Takeoff and Estimation
Technical Drawing Interpretation
Time Management and Organization
Communication and Teamwork

Projects/Experience: Civil Engineering Academic Projects, Website Development,Group Design Projects

LLMs USED: Google Gemini & Microsoft Copilot

SECTION 2 - LLM OUTPUTS

Microsoft Copilot

Professional Resume - Ianna E. Lozano

Email: ielozano@addu.edu.ph | Phone: 09912251658

Education

- **Ateneo de Davao University**
  Bachelor of Science in Civil Engineering (3rd Year)
  2022 - Present
- **University of Mindanao Tagum College**
  STEM Strand
  2020 - 2022
- **Legacy College of Compostela**
  2016 - 2020
- **Legacy College of Compostela**
  2010 - 2016

Skills

- AutoCAD (2D drafting and basic layouting)
- Microsoft Excel (basic formulas, data organization)
- Engineering Mathematics and Problem Solving
- Basic Quantity Takeoff and Estimation
- Technical Drawing Interpretation
- Time Management and Organization
- Communication and Teamwork

Projects / Experience

Civil Engineering Academic Projects

- Developed basic structural and framing plans for residential building designs
- Performed quantity takeoffs and cost estimations using Excel
- Created CAD drawings including floor plans and simple layouts

Copilot Copilot may make mistakes 1

- Applied engineering principles in solving real-world design problems

Website Development

- Designed and created websites with modern, user-friendly layouts
- Applied UI/UX principles for improved usability
- Integrated simple animations and styling for better engagement

Group Design Projects

- Collaborated with team members on engineering tasks and reports
- Assisted in planning, drafting, and presenting project outputs
- Practiced problem-solving under time constraints

Copilot Copilot may make mistakes 2

IANNA E. LOZANO

09912251658 | ielozano@addu.edu.ph | Davao City, Philippines

EDUCATION

Ateneo de Davao University 2022 – Present
Bachelor of Science in Civil Engineering (3rd Year)

University of Mindanao Tagum College 2020 – 2022
STEM Strand

Legacy College of Compostela 2010 – 2020
Primary & Secondary Education

SKILLS

Technical & Engineering: AutoCAD (2D Drafting & Layouting), Technical Drawing Interpretation, Basic Quantity Takeoff, Estimation.

Software & Tools: Microsoft Excel (Basic Formulas, Data Organization), Web Development (UI/UX Principles).

Soft Skills: Engineering Mathematics, Problem Solving, Time Management, Organization, Communication, Teamwork.

PROJECTS & EXPERIENCE

Civil Engineering Academic Projects
- Developed basic structural and framing plans for residential building designs.
- Performed quantity takeoffs and cost estimations using Microsoft Excel.
- Created CAD drawings including floor plans and simple layouts.
- Applied engineering principles to solve real-world design problems.

Website Development
- Designed and created websites utilizing UI/UX principles for modern, user-friendly layouts.
- Integrated styling and simple animations to improve user engagement.

Group Design Projects
- Collaborated with team members on engineering tasks and technical reports.
- Assisted in the planning, drafting, and presentation of project outputs.
- Practiced efficient problem-solving and decision-making under strict time constraints.

SECTION 3 - COMPARISON TABLE

CRITERIA	MICROSOFT COPILOT	GOOGLE GEMINI
STRUCTURE	Organized but slightly uneven; sections are separated but spacing feels inconsistent	Well-structured with clear hierarchy; sections flow logically and are grouped neatly
CLARITY	Clear and easy to understand, but wording is more basic and repetitive	Very clear with more refined and professional wording
FORMATTING	Simple and readable, but looks plain and less polished; spacing and alignment could be improved	Cleaner and more polished; better alignment, consistent spacing, and stronger visual hierarchy
OVERALL QUALITY	Good and usable for basic resumes, but feels more like a draft	Higher quality; more professional, polished, and ready for submission

SECTION 4 - REFLECTION

Both LLMs were kinda hard to use, they need lots of improvements. However, Among the two LLMs, Google Gemini performed better because its output was more organized, polished, and professional-looking. The formatting was cleaner, with better alignment and spacing, making the resume easier to read. It also used more refined wording, which made the overall document feel more suitable for job applications.

One of the main differences I observed was in structure and formatting. Microsoft Copilot produced a simpler and more basic layout, while Gemini created a more visually appealing and well-structured resume. In terms of clarity, both were understandable, but Gemini had more concise and professional phrasing. Copilot’s output felt more like a draft, while Gemini’s looked closer to a final version.

In my final resume, I improved the wording, organization, and formatting. I combined the strengths of both outputs by keeping the clear bullet points from Copilot and the polished structure from Gemini. I also made sure the content was concise and consistent, and adjusted spacing and headings to make it more professional.

From this activity, I learned that prompting is very important in getting good results from LLMs. A clear and detailed prompt helps produce more accurate and well-structured

outputs. I also learned that different LLMs can give different results even with the same prompt, so it is important to review, compare, and refine the output instead of using it directly.
